

**THE GRANGE SURGERY  
TRAVEL VACCINATION FORM**

Please complete and return form to reception. Once we receive a completed form we will be able to organise an appropriate appointment in which to commence your travel / risk assessment and vaccine schedule. Parents are responsible for ensuring that their children understand issues surrounding health and hygiene and all aspects of travel abroad.

Ideally you need to attend **2 MONTHS PRIOR** to travel departure so that immunisations can be planned and time allowed for immunity post vaccination to develop.

**We require you to contact one of the TRAVEL HELPLINES for up to date advice and details of the particular immunisations needed for each country you are visiting.**
